SKILLS

- **Backend**: PHP (Laravel), Node.js, RESTful APIs, MySQL, PostgreSQL, Supabase
- **Frontend**: JavaScript (ES6+), React.js, Angular, Next.js, HTML5, CSS3, TailwindCSS
- **Tools & Services**: Git, GitHub, Docker (basic), Postman, Figma, Firebase
- **Other Skills**: Agile/Scrum, API documentation, Debugging & testing, Third-party integrations (e.g. Flutterwave, Payscribe)

LANGUAGES

- English (Fluent)

PROFILE

I'm Stephen Eniola Omotoso, a passionate software engineer focused on backend development with working experience across real-world web application projects. I've had the opportunity to work closely with senior developers on fintech and enterprise-level systems, contributing to core backend logic, API development, and integrations with third-party services. My experience also extends to frontend development using modern frameworks like React and Next.js, allowing me to build and support full-stack applications when needed. I thrive in collaborative environments, but I'm also confident working independently on assigned tasks. I enjoy solving problems with clean, maintainable code and delivering software that works.

WORK EXPERIENCE

Backend Developer Intern
Rick Development Company

REMOTE | NOV 2023 – MAR 2024

- Collaborated with senior engineers to develop core backend features of a fintech application built with Laravel.
- Integrated third-party payment services such as **Flutterwave**, **Payscribe**, and **Safe Haven Microfinance Bank APIs**, enabling real-time transaction handling.
- Contributed to the design and implementation of a secure user authentication system using Laravel Sanctum.
- Participated in backend architecture planning using service-oriented architecture (SOA).
- Improved transaction response time by optimizing database queries and asynchronous job processing.
- Wrote clean, reusable code and maintained documentation for API endpoints.

Software Development Intern
Upperlink Limited

JULY 2023 – OCT 2023

- Worked across the full stack using Laravel, Angular, and React to build and maintain enterprise web applications.
- Contributed to the frontend UI/UX implementation for client dashboards and backend services like user management and invoicing systems.
- Collaborated in an Agile environment, regularly attending sprint meetings, and pushing code via Git.
- Implemented validation and security for forms and API endpoints using Laravel and Angular best practices.
- Handled feature bug fixes and participated in peer code reviews.

Frontend Developer Intern
HNG Internship Program (HNG10)

REMOTE | MAY 2023 – JULY 2023

- Developed and contributed to team projects using React.js, Next.js, and Supabase for backend services.
- Implemented responsive designs, authentication flows, and data-driven UI components.
- Worked in a fast-paced, team-oriented environment with tight deadlines and regular evaluations.
- Participated in tasks such as writing clean component-based code, consuming APIs, and debugging issues with teammates.

CERTIFICATIONS & PROGRAMS

HNG Internship Program (HNGx), 2023

Laravel for Beginners to Advanced – Udemy

JavaScript & React Fundamentals – FreeCodeCamp (2021)

PROJECTS

Fintech Wallet System (Rick Dev Co.)

- Built secure backend services with Laravel for wallet funding, withdrawal, and balance management.
- Integrated external APIs for payment processing and webhook-based transaction tracking.

HR and Employee Dashboard (Upperlink)

- Contributed to Angular-based frontend and Laravel backend. Built modules for employee leave requests and internal communication.

Hotel Booking Web Application

- Collaborated on a hotel management web app with React/Next.js. Used Supabase for real-time database and auth.
